

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

<i>von Baeyer's Gesammelte Werke:</i> PROFESSOR J. U. NEF.....	211
<i>Societies and Academies:—</i>	
<i>The Iowa Academy of Science:</i> L. S. ROSS.	213
<i>Discussion and Correspondence:—</i>	
<i>The Mutation Theory again:</i> DR. A. E. ORTMANN.	214
<i>Special Articles:—</i>	
<i>Herbarium Type Specimens in Plant Morphology:</i> DR. MEL. T. COOK.....	217
<i>The International Catalogue of Scientific Literature</i>	218
<i>Scientific Notes and News</i>	220
<i>University and Educational News</i>	224

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

THE ITHACA MEETING OF THE AMERICAN CHEMICAL SOCIETY. I.

THE thirty-fourth general meeting of the American Chemical Society met in the chemical laboratory of Cornell University, at Ithaca, N. Y., on June 28-30. The society met partly in general session and partly in sections as follows:

Inorganic Chemistry: L. M. DENNIS, chairman.
Organic Chemistry: G. B. FRANKFORTER, chairman.

Physical Chemistry: W. LASH MILLER, chairman.
Industrial Chemistry: J. D. PENNOCK, chairman.
Biological Chemistry: WALDEMAR KOCH, chairman.

Agricultural and Sanitary Chemistry: E. B. VOORHEES, chairman.

On Thursday evening there was a complimentary smoker given to the society by the Town and Gown Club. On Friday afternoon the members of the society attended the dedication of the Rockefeller Physical Laboratory. Following this, they left for an excursion to a hotel on Cayuga Lake, where dinner was served at 7:30. On Saturday morning Dr. E. Haanel, of the Department of Mines, Ottawa, Canada, gave an address on 'Electric Smelting Experiments at Sault Ste. Marie.' One hundred and thirty-two members of the society were in attendance on the meeting, which was a most enjoyable and successful one. The following are abstracts of papers which were presented:

GENERAL SESSION.

AFTER a brief address of welcome by Dean T. F. Crane and a response by President W. F. Hillebrand for the society, the following addresses were given:

The Terpenes and Colophonium with Some of Their Industrial Chemical Problems:
G. B. FRANKFORTER.

The author in cooperation with students has been studying the terpenes and colophonium for a number of years. The pine family of the north and west has been
